DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Species 5 (Figs. 19-23, claims 1-25) in the reply filed on 12/27/2006 is acknowledged. The traversal is on the ground(s) that all of the species are drawn to subject matter which are so related to each other that an undue burden would not be placed upon the Examiner by maintaining all of the species in a single application. This is not found persuasive because the many species of these application, if searched together, would cause a series burden on the examiner. However, examiner agrees that claims 1-25 belong to elected species 5 which will be examined.

The requirement is still deemed proper and is therefore made FINAL.

Allowable Subject Matter

2. Claims 1-25 are allowed.

3. The following is an examiner's statement of reasons for allowance: Claims 1-25 are allowable since certain key features of the claimed invention are not taught or fairly suggested by the prior art. In claim 1, "when a fingertip mounted with the force-feedback supply means comes in contact with a target object, the quantity of deviation corresponding to a thickness of the force-feedback supply means is removed from the virtual reality image". In claim 2, "when two fingertips mounted with the force-feedback supply means come in contact with each other, the quantity of deviation corresponding to a thickness of the force-feedback supply means is removed from the virtual reality image". In claim 11, "the quantity of deviation corresponding to a thickness of the force-feedback supply section is removed to bring the fingertip into contact with a target object in the virtual reality image displayed when the user's fingertip mounted with the force-feedback supply section comes in contact with the target object". In claim 12, "the quantity of deviation corresponding to a thickness of the force-feedback supply section is removed to bring two fingertips into contact with each other in the virtual reality image displayed when the user's two fingertips mounted with the force-feedback supply section come in contact with each other". The prior art of record however singularly or in combination fails to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
